

CFC 2025 23rd IACM Computational Fluids Conference

17-20 March 2025, Santiago de Chile

Submit MS proposal:

The MS proposal is aimed at the advancement of the thermal and chemical engineering sciences and applied to combustion technologies. This comprises high-temperature heat/mass transfer phenomena and multi-phase reacting flows, with applications in fuels production (H_2 , Syngas) and thermochemical processing.

Dr. Mario Toledo T., UTFSM
