

# Design and Physics-Enforced Modeling of Materials with Machine Learning

**Organized by:** K. A. Meyer (Chalmers University of Technology, Sweden), M. Kästner (TU Dresden, Germany), K. Kalina (TU Dresden, Germany), D. Kochmann (ETH Zürich, Switzerland), J. Fuhr (University of Texas at Austin, United States), S. Kumar (TU Delft, Netherlands), D. Seidl (Sandia National Laboratories, United States), and N. Vlassis (Rutgers University, United States)

**Keywords:** *Architected Materials, Data-driven approaches, Inverse Design, Machine Learning, Microstructure, Process-Structure-Property Linkages, Constitutive models, Neural Networks, PANN, PENN, CANN*
